

One of the world's leading provider of electronic voting systems and solutions

With offices and affiliates throughout the world we can truly offer a local service (if not in your own town, at least in your own time zone).

Infowhyse has been operating from Europe since 2004 and brings more than 15 years of international experience to the global audience response market.

The Power of Group Audience Response Systems Add Interactivity to Meetings and Classrooms with Audience Response Systems from Infowhyse!

Energise your corporate training, business meetings, customer surveys and market research with interactive group wireless Audience Response Systems (ARS) products and services technology from Infowhyse.

The keypads provided by Infowhyse are the most widely used interactive audience response systems in the world. It is the ultimate real-time interactive audience process tool for workshops and facilitated meetings as it combines audience polling and voting, cross-tabulation, and data reporting tools.

EdiVote™, EdiVote™ Pro SoftVote™, and SoftVote™ Pro, allow you to add the power of polling to your PowerPoint Presentations and Wisdom Wizard™ Textknowledgey™ enables the capture of thoughts and ideas in real time. All our Software works seamlessly with the Infowhyse audience response system keypads. Together the combined products enable you to take full advantage of every capability PowerPoint has to offer.

An illustration of how the Infowhyse Audience Response Systems work.

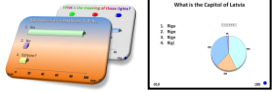

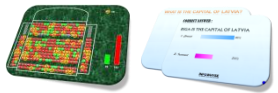

What are Audience Response Systems:	What benefits can be derived from using an Audience Response System:	How they are traditionally used...
<p>Audience response systems, group response systems, electronic voting systems, opinion polling, systems or decision support systems. No matter what name it comes under, interactive technology has caught the attention and the imagination of meeting planners, trainers, presenters and conference organizers right across the globe. In essence these innovative and interactive systems allow the users to make far more effective and powerful presentations whilst at the same time providing the recipients with an entertaining participative and motivational activity to further enhance the experience of the session that they are engaging in.</p>	<p>There are countless benefits to using an audience response system depending on the environment in which it is being used. For example:</p> <ul style="list-style-type: none"> Participation – to involve the audience, Learning – as a teaching or training aid, Retention – people remember more when they are involved, Empowerment – to facilitate consultation amongst groups, Motivation – to hear and react to the audience's opinions, Entertainment – through quizzes and games, Data Collection – Surveys or questionnaires, Evaluation – consensus or divergence of opinion, to name just a few. 	<p>Interactive technology can be the driving force for the organisation and delivery of effective presentations and more importantly, how it is received. You'll find audience response systems in seminars for opinion survey, benchmarking, and speaker feedback. In corporations for strategic planning and decision making. In AGM meetings for share voting. In pretty much any place people gather to interact. At first glance, you may not identify the full range of values and benefits – but take a deeper look. Utilising the technology merely as a convenient survey tool means that you miss out on 90% of its capabilities. Explore the endless possibilities with your Infowhyse Authorised Distributor.</p>

<p>SOFTVOTE CONNECTING MINDS TO PRODUCE SOLUTIONS</p>		<p>SoftVote™ has been built and specifically designed to further enhance the already significant capabilities provided by the Infowhyse Rental Network and to provide our customers with power-user applications and solutions not currently available elsewhere. Now we are pleased to announce that SoftVote™ is now available for purchase.</p>
<p>SOFTVOTE Pro CONNECTING MINDS TO PRODUCE SOLUTIONS</p>		<p>SoftVote™ Pro is without doubt the most powerful interactive voting software that works within the PowerPoint® environment. Added to all the regular features of SoftVote™, SoftVote™ Pro ingeniously combines the calculation capabilities of Excel® with PowerPoint® and SoftVote™ Pro's own charting capabilities. Only available on an annual subscription basis.</p>
<p>WISDOM WIZARD GROUP INNOVATION THROUGH THE ART OF TEXTKNOWLEDGY™</p>		<p>The Wisdom Wizard™ is a stand - alone application. The Key feature is to support the new SMS - functionality for Reply® Plus Keypads. The Wisdom Wizard™ Textknowledgegy™ allows for the collection of qualitative text responses together with sorting and voting capabilities to aid brainstorming, team collaboration and decision support activities.</p>

<p>Reply® Solo Works With (Keypads)</p>   	<p>Did you ever want to conduct a survey fast without a PC? Are you sometimes in a location that's inconvenient to set up a video display? Or are there places that just don't have electricity available?, If so, Reply® Solo is the answer. It's ideal for impromptu meetings on the production floor, a school field trip, a community meeting, a church study group, a youth sports team, or any other gathering at which you'd like to capture more useful feedback than the typical raised hands or loud voices usually provide. Reply® Solo is not a keypad, it is the base station collection device that works with Reply® Mini and Reply® WorldWide keypads.</p>
<p>Reply® Mini Works With (Bases)</p>   	<p>The Reply™ Mini offers a simple low cost solution with the additional benefit of the small form factor to provide greater mobility. Reply™ Mini is a miniaturized version of the popular Reply™ World Wide. Reply™ Mini is used in interactive meetings, special events, and other feedback activities that the audio-visual industry commonly classify as ' audience response ', ' group response ', or 'interactive voting '. Together Reply™ Mini wireless audience response keypads and a Reply™ WorldWide base station (or the new USB stick version) comprise a versatile two-way interactive voting system.</p>
<p>Reply® WW Works With (Bases)</p>   	<p>The Reply® WW is the proven choice for a single digit response system. This advanced two-way radio platform has an excellent reputation for consistent, reliable performance. The system is fast, rugged, and supported by a large catalogue of audience / student polling, voting, and testing software applications. That require participants to answer questions with numeric and/or multiple choice responses (like you would commonly encounter in interactive meeting, training, survey, auditing/assessment, game show, and market research activities). An excellent balance of price and features has made Reply® (Worldwide) yet another top selling RF product.</p>
<p>Reply® Mini+ Works With (Bases)</p>   	<p>The Reply® Mini+ is a miniaturized version of the popular Reply® Plus keypad. Allowing for Multi-Digit voting activities and mobile audiences moving from room to room, this versatile small form factor keypad is ideal in virtually all environments where an LCD display is not a critical requirement. Whether you're looking to expand your interactive options with a new response keypad or to try a response system for the first time, the all-new Reply® Mini+ (ease-of-use.Available with a full or USB miniturised base station) is ready to provide great value and ease of use.</p>
<p>Reply® Plus Works With (Bases)</p>   	<p>The Reply® Plus lets you harness the wisdom and creativity of your audience with an intelligent, multi-digit response tool. The Reply® Plus offers a unique blend of sophisticated input features in a small-footprint, durable and value oriented keypad. The Reply® Plus system employs advanced frequency hopping spread spectrum technology for excellent range, signal security, and speed. Standard features include multiple digit entry for responses and user IDs as well as SMS style texting, group and individual messaging, moment-to-moment polling, user defined keys, and much more.</p>
<p>Reply® IQ Works With (Base)</p>  	<p>The Reply® IQ is an ideal solution for large meetings or classrooms. This response device uses radio frequency technology to transmit responses faster than any large audience response system. This makes it possible for a group of 300 people to respond to polling or test questions in less than two seconds. Reply® IQ Features An advanced wireless communications system that adds new dimensions of interaction to conferences, delegate voting sessions, decision support systems, focus groups, and other sophisticated group interaction applications. This system is powerful, scalable, and considered the smart choice for audience response professionals.</p>
